To minimize safety risks, before dropping your rechargeable batteries or cell phones into the collection box, please place each individual rechargeable battery, or cell phone battery, into a separate plastic bag. If plastic bags are unavailable at the collection location, you can cover the battery terminals with tape (electrical, duct, or masking)

Remember: ONE rechargeable battery or ONE cell phone with battery, per bag.

Propane Tank Recycling One Pound Cylinders

These small cylinders will be accepted at the Ingham County Household Hazardous Waste (HHW) collection site, located at the Ingham County Human Services Facility, 5303 S. Cedar Lansing. The collection site is open every Thursday from 2-6 p.m., April 1 to September 30.

Call 887-4312 for a list of additional items accepted at the HHW collection and a map to the site.

SHARPS COLLECTION **FREE**

TO ALL *INGHAM COUNTY* RESIDENTS*

Residents who use syringes, needles and lancets to administer medications at home and produce “sharps” medical waste can prevent injury, infection, and pollution by utilizing the Ingham County Medical Sharps Disposal Program.

Participants can bring in sharps for disposal in any rigid container, including red medical waste containers, coffee cans, or plastic detergent bottles. Sharps will not be accepted in bags or any soft sided container that the sharps can poke through.

Full containers can be brought to the
Ingham County Health Department
5303 S. Cedar Lansing

(enter door #3, second floor, enter the Health Department, follow signs to Environmental Health, Monday –
Friday, 8 a.m. to 5 p.m.)

For further information call:

887-4312

Ingham County Health Department
Bureau of Environmental Health

*This program is NOT available to doctor/dentist offices, businesses, stores, offices or any other non-residential location.

Wal-Mart	3225 Towne Center Blvd., Lansing	517-487-9150	All plastic bags

Compact Fluorescent Light Bulbs

Why Switch?

If you haven't already converted the lights in your home from the traditional incandescent bulbs to Compact Fluorescents (CFL), you may want to after reading this. Consider the following benefits:

CFLs are four times more efficient and last up to 10 times longer than the incandescents, even though the CFL's cost a bit more at first, you save money in the long run.

Replacing a single incandescent bulb with a CFL will keep a half-ton of CO₂ out of the atmosphere over the life of the bulb, thereby reducing pollution.

According to the U.S. EPA, if every home in America replaced just one incandescent light bulb with an Energy Star CFL, it would save enough energy to light more than 3 million homes and prevent greenhouse gas emissions equivalent to those of more than 800,000 cars annually.

Recycling & Disposal Information:

The Ingham County Health Department accepts CFL's at their household hazardous waste collections. CFL's contain a small amount of mercury, about 5 milligrams, roughly the size of the tip of a ball-point pen, therefore the US EPA recommends taking it to a local household hazardous waste collection. In Ingham County, these collections take place each Thursday, from 2-6 pm at the Ingham County Health Department, at the corner of Cedar and Jolly, from April – September. Please call 887-4312 for more information.

The Board of Water & Light also accepts intact, burned out CFLs for recycling and/or proper disposal at their main office, located at 1232 Haco Drive in Lansing.

Proper Use

CFL's should be handled properly as they are made of glass and can break. Use caution when removing them from their packaging and installing or removing. Install or remove CFL's by holding on to the base, not the glass. Do not forcefully twist the CFL into a light socket.

Broken Bulbs

The U.S. EPA suggests the following steps be taken if you break a fluorescent bulb in your home:

- 1) Open a window and leave the room for 15 minutes or more.
- 2) Carefully scoop up the fragments and the powder with stiff paper or cardboard and place them in a sealed bag.
 - Use disposable rubber gloves if available – do not use bare hands. Wipe the area clean with a damp paper towel or disposable wet wipes and place them in a plastic bag.
 - Do not use a vacuum or broom to clean up the broken bulb on hard surface.
- 3) Place all cleanup materials in a second sealed plastic bag.
 - Place the first bag in second sealed plastic bag and put it in the outdoor trash container or in another outdoor protected area for the next normal trash disposal.
 - Wash your hands after disposing of the bag.
- 4) If a fluorescent bulb breaks on a rug or carpet:
 - First, remove all materials you can without using a vacuum cleaner, following the steps above. Sticky tape such as duct tape can be used to pick up small pieces of glass and powder.
 - If vacuuming is needed after all visible materials have been removed, vacuum the area where the bulb was broken, remove the vacuum bag (or empty and wipe the canister) and put the bag or vacuum debris in two sealed plastic bags in the outdoor trash or protected location for normal disposal.
