SHARPS COLLECTION

FREE

TO ALL *INGHAM COUNTY* RESIDENTS*

Residents who use syringes, needles and lancets to administer medications at home and produce “sharps” medical waste can prevent injury, infection, and pollution by utilizing the Ingham County Medical Sharps Disposal Program. Participants can bring in sharps for disposal in any rigid container with a tight lid, including red medical waste containers, coffee cans, or plastic detergent bottles.

Sharps will NOT be accepted in bags, glass jars or any soft sided container that the sharps can poke through, such as pop bottles, milk jugs, diaper wipe containers or cardboard oatmeal containers. Any containers with items sticking out, without lids or with loose lids will NOT be accepted.

SHARPS DROP-OFF SCHEDULE

May through September
Ingham County Household Hazardous Waste Collection
Every Thursday 2-6 p.m.

5303 S. Cedar, Lansing, behind the Ingham County Human Services Building, follow signs to collection site

For October through April either:

- Call the Ingham County Recycling Hotline number below; or
- Granger accepts full sharps containers at their Wood Road recycling site office; Monday – Friday 9 a.m. to 4 p.m. Call 517-372-2800

For more information.

For further information call the Ingham County Recycling Hotline:
517.887.4312

*This program is NOT available to doctor/dentist offices, businesses, stores, offices or any other non-residential location.

Wal-Mart	3225 Towne Center Blvd., Lansing	517-487-9150	All plastic bags

Compact Fluorescent Light Bulbs

Why Switch?

If you haven't already converted the lights in your home from the traditional incandescent bulbs to Compact Fluorescents (CFL), you may want to after reading this. Consider the following benefits:

CFLs are four times more efficient and last up to 10 times longer than the incandescents, even though the CFL's cost a bit more at first, you save money in the long run.

Replacing a single incandescent bulb with a CFL will keep a half-ton of CO₂ out of the atmosphere over the life of the bulb, thereby reducing pollution.

According to the U.S. EPA, if every home in America replaced just one incandescent light bulb with an Energy Star CFL, it would save enough energy to light more than 3 million homes and prevent greenhouse gas emissions equivalent to those of more than 800,000 cars annually.

Recycling & Disposal Information:

The Ingham County Health Department accepts CFL's at their household hazardous waste collections. CFL's contain a small amount of mercury, about 5 milligrams, roughly the size of the tip of a ball-point pen, therefore the US EPA recommends taking it to a local household hazardous waste collection. In Ingham County, these collections take place each Thursday, from 2-6 pm at the Ingham County Health Department, at the corner of Cedar and Jolly, from April – September. Please call 887-4312 for more information.

The Board of Water & Light also accepts intact, burned out CFLs for recycling and/or proper disposal at their main office, located at 1232 Haco Drive in Lansing.

Proper Use

CFL's should be handled properly as they are made of glass and can break. Use caution when removing them from their packaging and installing or removing. Install or remove CFL's by holding on to the base, not the glass. Do not forcefully twist the CFL into a light socket.

Broken Bulbs

The U.S. EPA suggests the following steps be taken if you break a fluorescent bulb in your home:

- 1) Open a window and leave the room for 15 minutes or more.
- 2) Carefully scoop up the fragments and the powder with stiff paper or cardboard and place them in a sealed bag.
 - Use disposable rubber gloves if available – do not use bare hands. Wipe the area clean with a damp paper towel or disposable wet wipes and place them in a plastic bag.
 - Do not use a vacuum or broom to clean up the broken bulb on hard surface.
- 3) Place all cleanup materials in a second sealed plastic bag.
 - Place the first bag in second sealed plastic bag and put it in the outdoor trash container or in another outdoor protected area for the next normal trash disposal.
 - Wash your hands after disposing of the bag.
- 4) If a fluorescent bulb breaks on a rug or carpet:
 - First, remove all materials you can without using a vacuum cleaner, following the steps above. Sticky tape such as duct tape can be used to pick up small pieces of glass and powder.
 - If vacuuming is needed after all visible materials have been removed, vacuum the area where the bulb was broken, remove the vacuum bag (or empty and wipe the canister) and put the bag or vacuum debris in two sealed plastic bags in the outdoor trash or protected location for normal disposal.
